

# Assignment#2

## Personal Website - Who am I

---

## INTRODUCTION

You are required to build a multi-page responsive website that will introduce yourself to the world. In this website you will tell the world different facts about your personal life. For example the skills in which you are an expert, your current profession, leaders and mentors you follow the most etc.

The exact requirements that you need to follow, in order to complete this project are given below:

### Structure of your website

#### Number of pages

The website must include the following pages:

**(i) A welcome page (Marks = 10)**

(1) This page may contain content related to your personal life details like your hobbies, skills, expertise, ambitions and profession etc. The page may also be divided into different sections representing short intro about content that is present on other pages of your website.

(2) This page will serve as the “home page” of your website. You are free to include any kind of content to make it aesthetically pleasing such as an image slider, banner, etc.

**(ii) Favorite Personalities page (Marks = 10)**

(1) This page will showcase the persons you like the most. These personalities may be from politics, sports, showbiz, or any leader, etc.

Your favorite Personalities must include following:

- a) Names
- b) Images of that personalities
- c) 3 to 4 lines intro about them

**(iii) Favorite cities page (Marks = 10)**

(1) You are free to design that page according to your preference.

Favorite Cities must include the following:

- a) Names and short intro
- b) Images of each city
- c) Optional youtube video embedded into your page

**(iv) Favorite Tourist spots page (Marks = 10)**

(1) You are free to design that page according to your preference.

Favorite Tourist spots must include the following:

- a) Names and short intro of at least 6 favorite spots
- b) Images of each location

c) Optional youtube video embedded into your page

**(v) Contact Information Page (Marks = 10)**

(1) You are free to design that page according to your preference.

(2) Include an **HTML form** to collect relevant user data such as user's name, email, contact number etc.

**Points to remember that will directly affect your final marks**

- Your web pages must be “**Fully Responsive**”. The layout must be adaptable for different screen sizes. **(Marks = 10)**
- Each page must contain a “**Navigation Bar**”. The navigation bar **must stay fixed on the top** even if you scroll the page up or down (explore Bootstrap NavBar component for this purpose). **(Marks = 5)**
- Each page **must include a footer containing social media icons**. When we click those icons the browser must take us to the respective profile pages of your social media accounts such as Facebook profile, YouTube channel, Instagram handle, LinkedIn profile, etc. **(Marks = 5)**
- Try to “**embed videos from YouTube**” inside your pages that are related to your favorite places, tourist spots, or personalities. **(Marks = 0)**
- Also deploy your website on **SURGE** server and create a **GitHub repo** for your project as well. **(Marks = 10)**
